

DO NOT discontinue landline phones. They are a LIFELINE for ALL, especially those who have had their health damaged by wireless communication. Wireless communication is cellular 'RADIATION.' We are emitting massive amounts of man-made radiation into our environment. It is destroying biological life. It damages and mutates cells. Those who have had their health damaged are forced to live a life in seclusion. In which, I am one. I've always enjoyed 'Little House on the Prairie.' People back then were not as secluded or ostracized as those of us who have had our health damaged by wireless communication, which is cellular radiation. They could go places and be involved within the community. When your health is damaged by wireless radiation, your body can no longer handle the massive amount of radiation that is being emitted into the atmosphere by wireless communication, therefore forcing us into seclusion leaving us with only the landline phone as a lifeline to the outside world. It is our only way to call for help whether it be an emergency or otherwise. If landline phones are discontinued my lifeline will be disconnected. You WILL disconnect my life and my ability to get help when ever needed. Is it not enough that my abilities to live a normal life and the ability to work and provide for myself have been taken from me? You now are going after my lifeline or my life, because the landline phone is an extension of my life. It's bad enough to be forced into this type of life by our government and the wireless radiation industry leaving one to survive with no help from either, that you now want to take away my lifeline. This is cruel! I would expect this from a third world dictator, but not the United States.

DO NOT ALLOW LANDLINE PHONES TO BE TAKEN AWAY!!!

Sincerely,

Becky Huck
